## MUSLIMS FOR AMERICAN PROGRESS (MAP) METHODOLOGY & REFERENCES

The Muslims for American Progress project team conducted quantitative and qualitative data collection and analysis between January and October 2016. Qualitative interviews were conducted with individuals from all eight focus areas: Medicine, STEM, Civics & Democracy, Philanthropy & Nonprofit, Education, Economics, Art & Entertainment, and Sports. A surname analysis<sup>10</sup> was conducted on data sets acquired from the United States Patent and Trademark Office, the Michigan Department of Education (MDE), and from the Department of Licensing and Regulatory Affairs (LARA). Secondary analysis was conducted on economic and population source material from “The Muslim Green: American Muslim Market Study 2014-15” (DinarStandard and AMCC), the Bureau of Labor Statistics (BLS) Aggregate Expenditures Reports, and the Pew Research Center, 2011, “Muslim Americans: No Signs of Growth in Alienation or Support for Extremism” report.
